

Grilling

When summer is here, it comes with a wide array of fun outdoor activities like family barbecues, trips to the beach, and campfires, just to name a few. Make sure your summer outdoor grilling plans don't include a trip to the emergency room.

SAFETY TIPS:

- Use only charcoal lighter fluid to start a fire.
- Once coals are ignited, never add more charcoal lighter fuel or other flammable/petroleum based products to the fire - the container may explode in your hand!
- Dispose of used coals in proper containers.
- Be sure propane grills have the correct setting when being installed.
- Use grills at least 10 feet away from your house.
- Keep children and pets away from grills when in use.
- Dispose of hot coals in proper receptacles - buried coals retain heat for up to 24 hours and may cause a serious burn injury to an unsuspecting passerby who steps on them.
